

Eagle Technology Management, Inc.

ETM's consulting team provides services to insurance entities that are designed to enhance or supplement their internal financial and reporting departments. In addition, our team provides an in-depth understanding of financial reporting, investment management and insurance regulation that can be used to provide a solution or service for most situations.

Our team can provide expert knowledge to complete the annual and quarterly statement filings required by the NAIC and State Departments of Insurance. Our services will save you time, resources, and provide maximum compliance and efficiencies.

#### **Our team will prepare the following items:**

- Annual Statement
- RBC Report
- Supplemental Filings
- Quarterly Statements
- State Forms

In addition to preparing the above items our team will also provide you with audit support, assistance with inquiries from the NAIC or DOI and guidance on Statutory Accounting Principles. Our team will use highly specialized software to gain efficiencies in completing the filings while giving you access to view or create reports ad hoc at no additional charge.

As regulations and statutory accounting rules change, our consulting team members keep pace. We monitor statutory accounting trends, NAIC activities, State Departments of Insurance, laws, regulations, and other factors affecting regulations. Since our team members hold professional certifications and advanced degrees and have public accounting and industry experience. We create best practices and adhere to professional standards. In addition, we frequent NAIC meetings and receive ongoing training on auditing standards and statutory accounting principles. We're also familiar with accounting and statutory financial reporting software.
